**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/598,782

**Applicant(s)**

PARK ET AL.

**Examiner**

Krishnan S. Menon

**Art Unit**

1797

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 27 January 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-25 and 27-30 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) 1-25 and 27-30 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/S5108)
- Paper No(s)/Mail Date 9/11/06
- 4) ☐ Interview Summary (PTO-413)
- Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of claims 1-25 and 27-30 in the reply filed on 1/27/09 is acknowledged.

The restriction requirement is hereby withdrawn since applicant amended the claims to make all claims filter-rotor combination.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4 and 5 fail to further limit claim 1: claim 4 repeats the limitation of claim 1. Claim 3 and 5 are duplicates – partial overlap has no significance: *overlap means partial coverage*.

Claims 6 and 7: unclear what is claimed. Does this mean they are concentric and have the same diameter? It is so assumed for examination on merits.

Claim 15: does not further limit claims 1 and 4.

Claims 16, 20: the first part does not further limit claim 1, and is also duplicated in other claims; the second part – there is no corresponding structure disclosed: the protrusion is believed to be on the blade, not between the first and second blades.

Claim 24: conflict with claim 1 – there is a membrane between the two blades.

Claim 25: not clear what the “body” means. Is it the housing, or barrel? If so, it is repeating claim 1.

It is also suggested that applicant correct the claims for language and grammar.

### ***Claim Rejections - 35 USC § 102***

Claims 1-25 and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasaki (US 4,066,546) and/or Henttonen et al (US 6,027,656), and/or Huebel (US 5,925,247), and/or Rolchigo et al (US 5,993,674).

**Sasaki** teaches filter discs alternately interspersed with rotor discs as claimed – see figures 6 and 7 copied below. The rotor discs have vanes, ribs or ridges (214) on it.

The rotor discs differ from the "blades" as recited in applicant's claims in the light of the disclosure in the specification. However, "vanes" is only an obvious variation of the disc design, and is also known in the art as shown by Henttonen.

**Henttonen** teaches filters interspersed with rotary blades having plurality of blades – see figures. Figure 4 has blades 15 having ridges 20 on them. This reference also teaches irregularities on the rotors thus:

"According to one embodiment of the rotor it is designed in such a way that the essentially plane surfaces of the wings directed towards the filter are provided with irregularities deviating from the plane of the wing surface. The irregularities may, for example, be through-holes, recesses or slots, or bosses."

These references also differ from the specific claim limitation of "different positions" for the alternating blades. However, having the blades of Henttonen or the vanes of Sasaki being oriented in different positions would not be a patentable limitation because the blades or vanes could have differing positions as they are assembled as a random variable, and the teaching of the references do not specify that they have to be in the same position.

**Rolchigo** teaches rotor discs having ridges (figure 8). Rolchigo also teaches providing holes in the rotor disc to prevent movement of the disc and filters towards each other (abstract) due to the pumping action of the rotor disc.

**Hubel** teaches membrane carrier discs with perpendicular protrusions (18, 180) on the surface (figures), and carrier cushions (C3, L 34-54). One of ordinary skill in the art would provide such protrusions on the carrier disc or the rotor disc/vane to provide turbulence and swirl for the flowing medium as taught by Hubel (lines 50-54, column 3).

Such limitations are also known in the art, and therefore, unpatentable.

The filter tray is fixed; has the separation membrane affixed to a disc having drain paths and drain cloth, or filter support in other references. Hubel has a cushion for the filter above the carrier disc.

It would be obvious to one of ordinary skill in the art to combine the teachings of two or more of the cited references to arrive at applicant's claimed invention because it provides nothing more than predictable results - See KSR Int'l. v. Teleflex Inc., 127 S. Ct. 1727, 1732, 82 USPQ2d 1385, 1390 (2007). "it is commonsense that familiar items have obvious uses beyond their primary purposes, and a person of ordinary skill often will be able to fit the teachings of multiple patents together like pieces of a puzzle". "The combination of familiar elements according to known methods is likely to be obvious when it does no more than yield predictable results".

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S. Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vickie Kim can be reached on 571-272-0579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Krishnan S Menon/  
Primary Examiner, Art Unit 1797
